BUSINESS FIELD

01 | MEDICAL

Research and consulting services for your business issues in the medical field

We provide the highest quality services while adapting to the changing environment, based on our experience in primary research (qualitative and quantitative) and secondary research in the medical field both in Japan and overseas. We also provide research consulting in a wide range of fields, from pre-disease and prevention to testing, diagnosis, treatment, prognosis, and nursing care, as well as lifestyle-related diseases, cancer, and rare diseases.

Leveraging our extensive experience in interviewing and surveying medical professionals and patients, as well as our network with experts and knowledgeable people, we support our clients' decision-making and strategy planning by conducting acceptability assessments of pharmaceuticals, medical devices, medical IT, building business models, and conducting competitive analyses. As a partner in the medical field, we are constantly evolving to solve our clients' business issues and contribute to improving patient experience through market research consulting.

Marketing/Consulting

- New drugs for rare diseases
- Launch strategy consulting
- Patient journey research for menopausal medication consulting for high-precision cancer medication entry
- Survey to grasp the actual situation of pathologists

And many more

02 | DRUG DISCOVERY · BIOTECHNOLOGY

Trend research and support for the medical industry

We regularly investigate the latest trends and technological trends in the drug discovery and biotechnology industries. We conduct original research across a wide range of topics, including management indicators, organization, R&D, sales activities, and overseas expansion.

- We provide research consulting on the latest trends in the pharmaceutical industry, utilizing extensive data based on over 40 survey results.
- We grasp domestic and international research trends in notable life science technologies such as regenerative medicine and genome/genetic information. It enables us to provide optimal information on the latest innovations to create new business opportunities.
- We also focus on pharmaceutical outsourcing, regularly investigating safety testing organizations, CROs/SMOs, pharmaceutical intermediates/APIs, formulation contracts, packaging contract companies, and biopharmaceutical CDMOs, and provide publication of research reports and related contracted research and consulting.
- We provide various research and consulting services, such as investigating regulatory systems and searching for business partners, to bridge and commercialize technological seeds originating from academia. We contribute to the development of the drug discovery and biotechnology fields through our specialized knowledge and abundant data.

Marketing/Consulting

- Research on drug discovery

BUSINESS DESCRIPTION

01 In-house Planned Research/ Report publication

Since our founding in 1983, we have provided over 1,000 self-designed market research reports, and continue to publish around 70 new market research reports every year. Based on our self-designed research reports specialized in each field, we can analyze the market from various angles and use them to help our customers' business strategies.

We are committed to always providing the latest information and expertise to contribute to our customers' success.

02 Customized Research/ Consulting

We will propose market research and custom research that meet your needs. We utilize our abundant information and extensive personal network to provide highly accurate research reports.

In our consulting services, we can provide optimal solutions to lead your business to success by utilizing the expertise and experience we have cultivated through many years of consulting experience. We will always listen to our customers' requests and sincerely support their businesses.

03 Project support for Government agencies, Local governments, Universities, and other academic institutions

We manage the secretariats of government agencies, academic societies, councils, and study groups. Based on our extensive experience in market research and consulting, we have been working on a wide range of tasks, including secretariats, seminars, symposiums, event management, market research, and websites, making use of our president's experience and extensive intellectual network. Through projects with government agencies, local governments, universities, and other academic institutions, we aim to develop society and build a better future by supporting public institutions in resolving their issues.

BUSINESS DESCRIPTION

04 Planning and Running of Research meetings and Seminars

We plan and manage research meetings and seminars in which active doctors, university professors, government officials, etc.. Through these activities, we aim to improve the knowledge of industry groups.

- Near-future video forum, forum for creating new businesses using ICT, forum for research into creating new businesses in a hydrogen and renewable energy society, and many more.

05 Media Management

As a means of disseminating information, we operate three online media: "Digital Gyosei", "ExchangeWire Japan", and "Medical Tech News". Through these media, we connect with the most influential people in each industry and provide the latest information on each industry, thereby increasing our presence and influence.

06 System Development

In order to accurately grasp the ever-changing market and customer needs, web scraping technology that automatically collects necessary information from websites and web survey systems that enable efficient survey implementation and analysis have become indispensable tools. We provide a one-stop service from requirements definition to design, development, and operation to find the system that best suits your challenges and objectives. We provide strong support for your business through high-quality data acquisition and analysis.

Market Research & Consulting

SEED PLANNING

SEED PLANNING / THE FEATURE

01

Specializing in cutting-edge research

We have five departments that specialize in cutting-edge research and have a wealth of experience and research reports. Our highly specialized researchers with extensive experience and a proven track record will create research reports based on the latest information and insights tailored to your needs. We provide flexible response and high-quality services to ensure the success of your business.

02

Expert network

We build partnerships with leading experts and those with a strong track record in their fields, and collaborate with academic and research institutions. We also work to improve the skills and knowledge of our experts through regular training and information exchanges.

This allows us to have access to the latest knowledge and trends, and build a network of outstanding experts in a wide range of fields.

03

Unique overseas network

We can provide the latest overseas case studies by utilizing our own network of overseas research institutes and experts. In addition, by working with overseas partner companies, we create our own detailed research reports, which are useful for the decision-making of many clients.

As a result, we have received repeat business from many clients.

SEED PLANNING / THE FEATURE

04

Unique healthcare professional panel

We have our own reliable physician survey panel with over 18,000 registered physicians, and can conduct surveys tailored to our clients' needs, as well as questionnaires and interviews with physicians.

In addition to physicians, we also have panels specializing in specialized fields such as pharmacists, nurses, clinical laboratory technicians, veterinarians, and dentists, allowing us to conduct one-stop surveys of a wide range of attributes.

05

BtoB specialist panel (local government, medical, IT, advertising)

We have our own specialized panel (medical professionals, advertising industry, local government officials) that we have built up over many years of experience, and are able to conduct a wide range of research, including questionnaires.

We also create highly specialized research reports based on that information, and support the success of our clients' businesses with research using specialized panels that only a research company can provide.

06

Executive Community

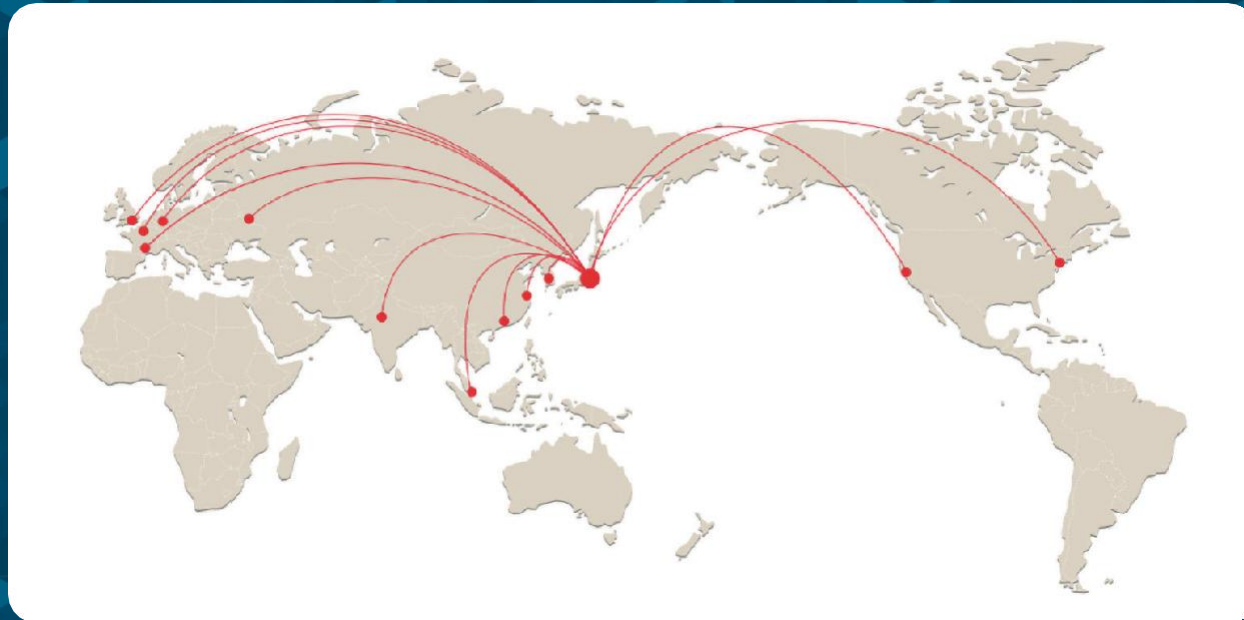

The "Seed Thanks Club" is a business community created to mark the 40th anniversary of Seed Planning's founding. It is consisted of people who strongly identify with Seed Planning's business and have continued to build strong business partnerships over the years. We will support our customers in solving problems in their specialized fields by utilizing the knowledge and connections of this community, which is made up of people who have a great influence in the industrial and academic worlds and are active at the forefront.
